

Create an AAD application specific security group

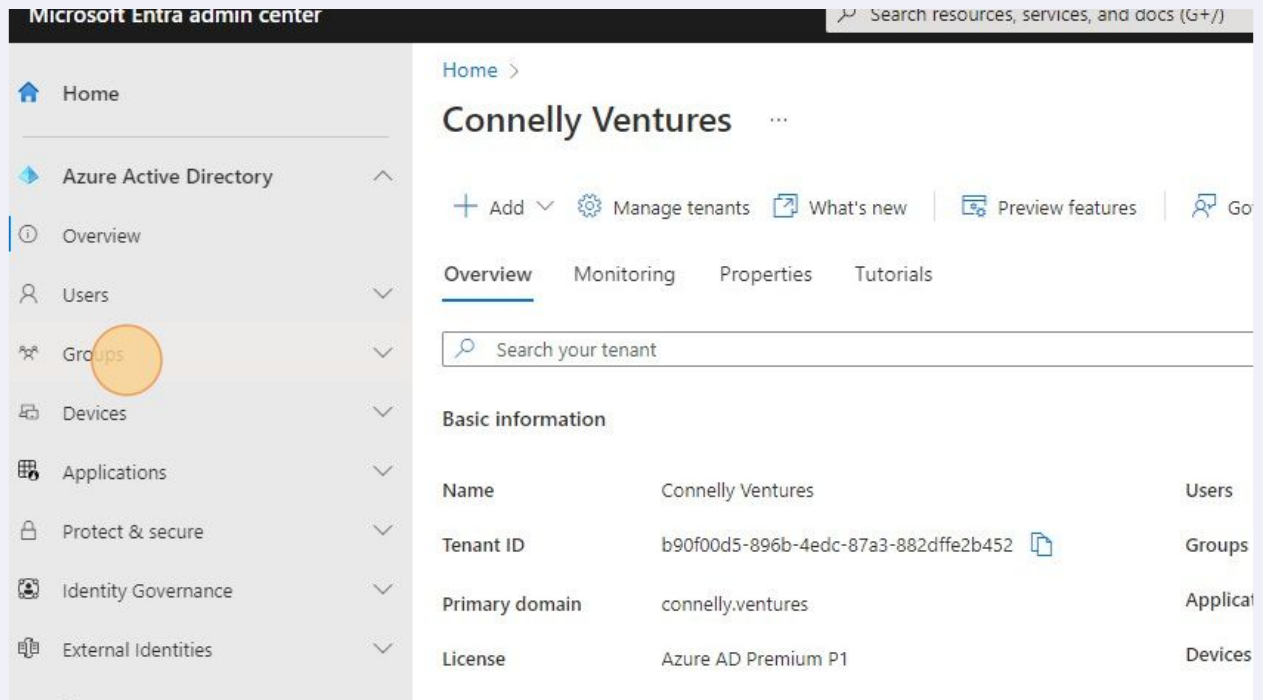

In this tutorial, we need a security group to target most devices with security baselines. We navigate to Entra to configure the security group.

1 Navigate to entra.microsoft.com

2 Click "Go to Azure Active Directory"

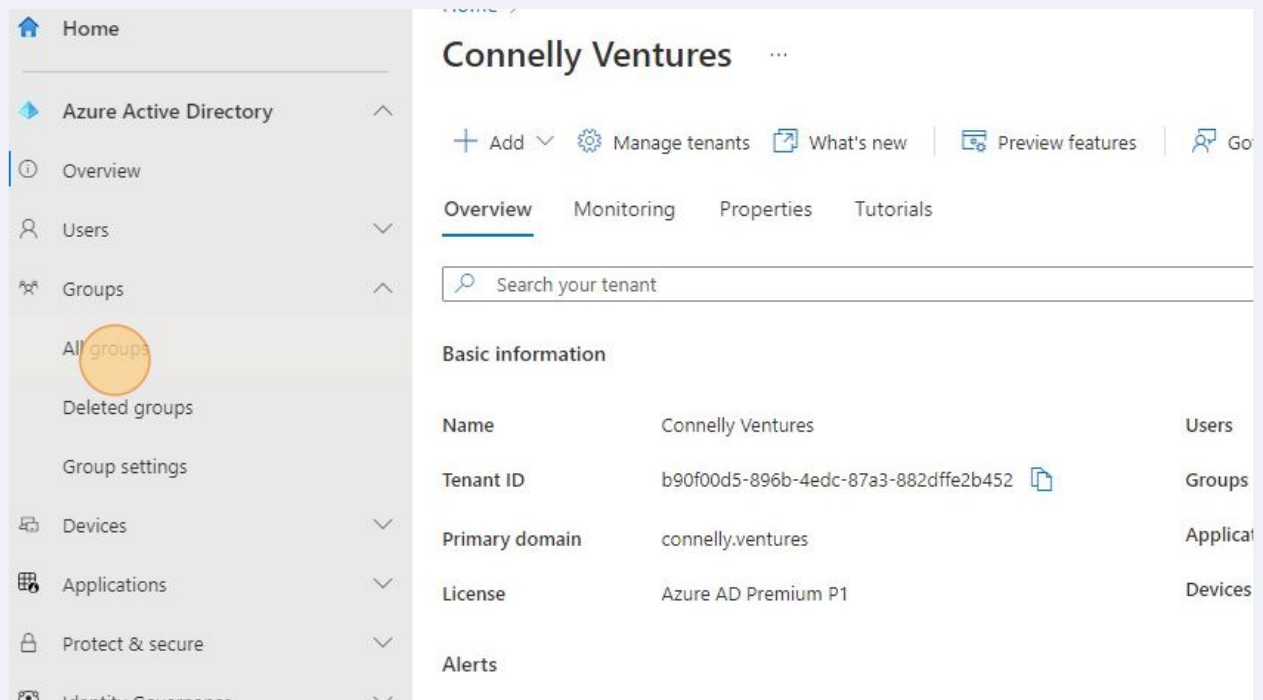

3 Click "Groups"

The screenshot shows the Microsoft Entra admin center interface. The left navigation pane is expanded, and the 'Groups' link is highlighted with an orange circle. The main content area displays the 'Connelly Ventures' tenant overview, including tabs for Overview, Monitoring, Properties, and Tutorials. The 'Overview' tab is active, showing a search bar and a table of basic information.

Basic information		
Name	Connelly Ventures	Users
Tenant ID	b90f00d5-896b-4edc-87a3-882dffe2b452	Groups
Primary domain	connelly.ventures	Applicat
License	Azure AD Premium P1	Devices

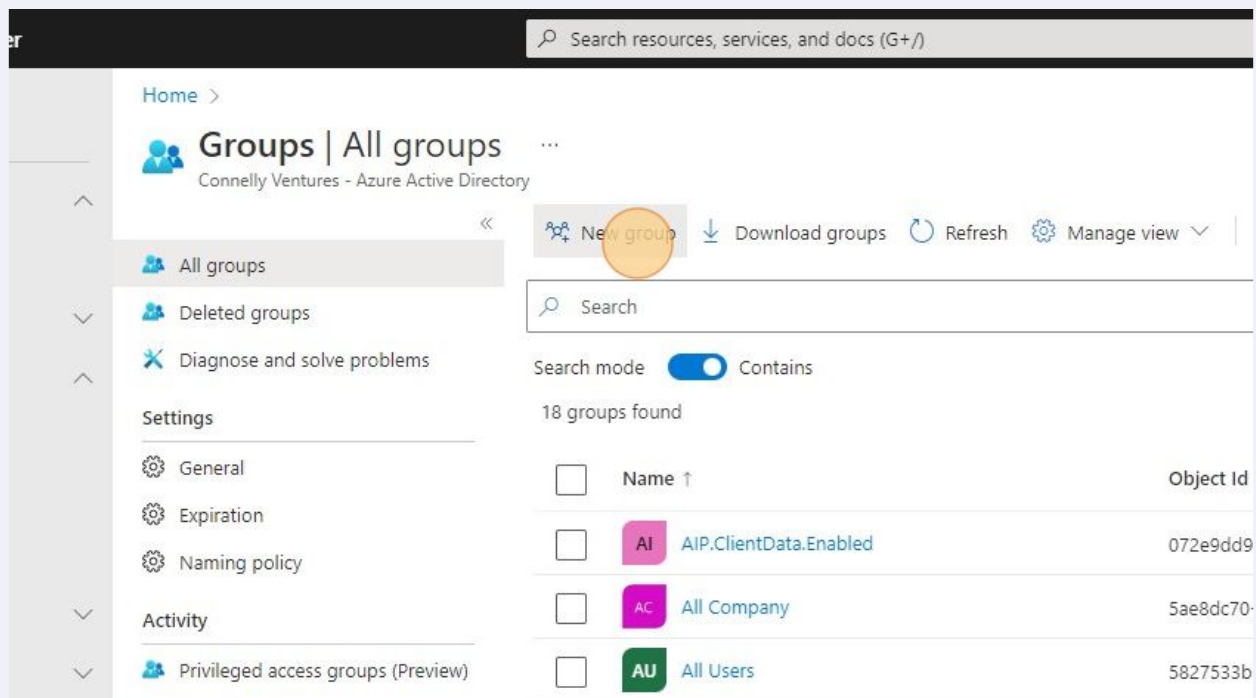

4 Click "All groups"

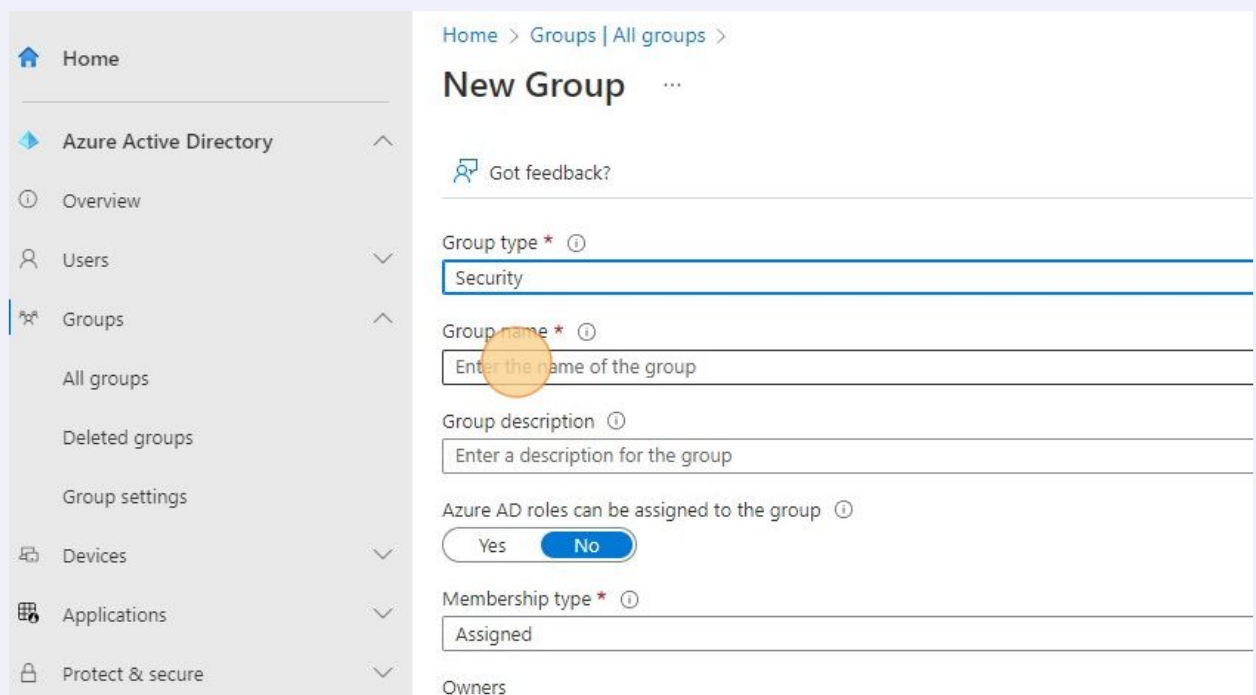

The screenshot shows the Microsoft Entra admin center interface. The left navigation pane is expanded, and the 'All groups' link is highlighted with an orange circle. The main content area displays the 'Connelly Ventures' tenant overview, including tabs for Overview, Monitoring, Properties, and Tutorials. The 'Overview' tab is active, showing a search bar and a table of basic information.

Basic information		
Name	Connelly Ventures	Users
Tenant ID	b90f00d5-896b-4edc-87a3-882dffe2b452	Groups
Primary domain	connelly.ventures	Applicat
License	Azure AD Premium P1	Devices

5 Click "New group"

6 Click the "Group name" field.

7 Type "DFE.BaselineConfigurationProfile.Enabled"

8 Click the "Group description" field.

Azure Active Directory

- Overview
- Users
- Groups
- All groups
- Deleted groups
- Group settings
- Devices
- Applications
- Protect & secure
- Identity Governance
- External Identities
