Excluded groups

ⓘ When excluding groups, you cannot mix user and device groups across include and exclude. [Click here to](#)

+ Add groups

15 Add the group that you need to target.

The screenshot shows a software interface with a light purple border. On the right side, there is a panel titled "Selected items". Below the title, there is a list containing one item: "M3 M365.BusinessPremium.Enabled". To the right of this item is a small square checkbox. At the bottom center of the interface, there is a blue button with the word "Select" in white text.
