

Configure Microsoft 365 Group Settings

1 Navigate to admin.microsoft.com

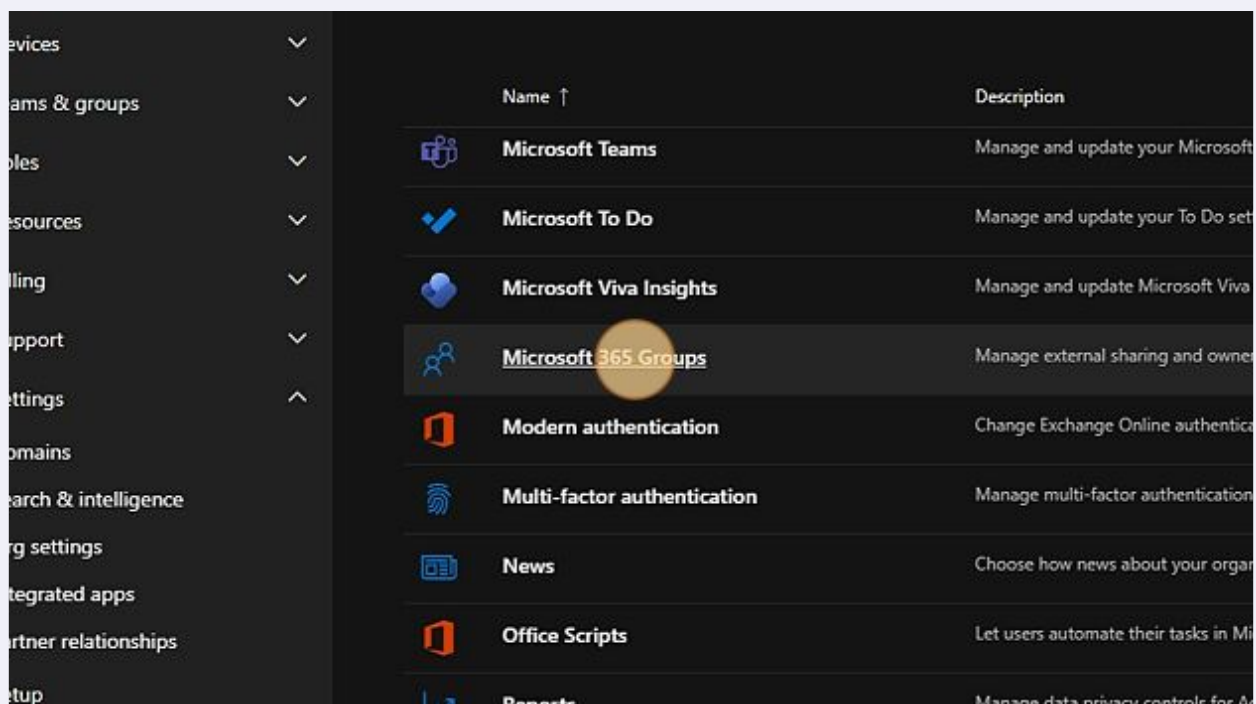

2 Click "Settings"

3 Click "Org settings"

4 Click "Microsoft 365 Groups"

5 Check the box to enable ownerless group settings.

Groups as guests

☒ Let guest group members access group content

If you don't select this, guests will still be listed as members of the group, but they won't receive group emails or be able to access any group content. They'll only be able to access files that were directly shared with them.

Ownerless groups

All groups must have an owner to add or remove members. Owners have permissions like the ability to change group settings.

☒ When there's no owner, email and ask active group members to select an owner

7 Set "Number of active members to notify" to 3

subject and message

Groups

review and finish

Guest members are never invited to be owners. We'll let you know the outcome of the Microsoft Purview compliance portal audit log.

Notifications are sent weekly starting within 24 hours of policy creation.
